About This Game

The Last Baron's stunt

 A new round in the development of the Lunar Lander genre, a game moved from the machines of the 70s, but in a new wrapper, with new graphics, with different game physics modes, where you can choose between the complexity and comfort of gaming.

 The Levels with a variety of tasks, including: time trial, rocket persecutions, trials in which you will need to show mastery of flying at maximum speeds, as well as research trials.

 A Modern graphical shell that does not require high resources from a computer, offers modern 2D graphics.

 Great music, written specifically to create an atmosphere of intense cartoon.

A solid, straightforward platformer set in the absolutely bewildering "Manos" film. Of course it takes extreme liberties with the source material, though never as strange as Darth Vader turning into a scorpion. Environments are expanded upon, all set to 8-bit renditions of the movie soundtrack, with a new level set in Plan 9 from Outer Space. There's a lot to like, though absolutely nothing original to the gameplay- it's a quick and easy-ish play for lovers of all things Retro and/or Manos.

I leave you with two words: Torgo Mode.. I haven't finished it yet but I'm loving the retro style and writing. Many 'Easter Egg' references to other real life films (freddy kruger, friday the 13th, breakfast club, dirty dancing) are the only ones ive found so far. I also like the selective voice acting, running around a corner and stepping on a branch and hearing "C'MERE KID" or "I SEE YOU NOW." and you're being rushed by a bear mascot and a knife can give you a spook. The I LIED rocket launcher is pretty good AT if you know how to fire it so that it hit the top\back of the cyborg tank..

\u4ee4\u4eba\u9a5a\u8a1d\u7684\u58de\u3002 I thought this was a beautiful game. It is a great detective story with characters you become invested in and in a wonderful historical setting. The puzzles are interesting and challenging. They make you think but are not impossible. The game was well worth my time and money spent. I highly recommend this game and anxiously look forward to either a sequel or any future game from this developer!. This is the first game I've written a review for and the first game I've also asked for a refund for. I was first drawn to this as I enjoyed these games in my SNES days and liked the art style but i wasn't convinced enough to preorder. I did purchase at launch and regretted it having played it for even a brief time due to it being so shallow and dull. It has less depth then Super Double Dragon and is no where near as entertaining as Turtles in Time. I could easily concieve a better fighting system then what was implemented here and others had also 20 years ago. Probably destined to end up on Bundle Stars in a heap of other indie trash. All style no substance

Great twin stick shooter with crazy tight controls and silky smooth gameplay. Intuitive design, many improvements over the original/ultra. Feels closer to the original to me, in a good way, and with all the fun stuff from ultra added in. A lot changed but overall a great game. Plenty of enemies, and as hard as you want it to be. Currently smacking songs on Apocalypse (hardest difficulty) and between 200-300 intensity. You'll know what that is if you've played the first or when you play this. Money well spent.. One of the best visual novels I've ever played. Besides interesting characters and just gorgeous art it has this really neat mystic adventure vibe that makes the story all the more appealing and immersive and leaves you begging for more. Can't wait for the next chapters.. Would love to try this one out but never thought buying a newer pc would hinder me later to older games. Guess thats just how it goes. Wish there was a Dont buy and not a "not recommend" button. How would I know if I cant play it lol I hear its good though. Got me better at CS.. Okay so I've been searching for a good vr horror game for a long time, but the problem is, vr horror easily scares me into "quit app". There were some that i couldn't stand for 2 minutes, jumpscare are my absolute nightmare in vr as well. This game had nice reviews and said it was atmospheric and good horror, so i gave it a shot. At first I was pooping myself as usual on every small sound, but nothing really came out to jumpscare me, so the only thing that stayed with me through the game was the sheer terror of "something can happen any time" and the very well done atmosphere. The lore built up the conclusion very well too, to the point where what happens then, didn't scare me into submission, it just scared me, like it should.

Very well made game, you guys, I hope there's a few more chapters to this series because I'm getting them. :). Add please the graphics settings.. Good, dynamic Western shooter! Full immersion! Good graphics and voice, a large selection of weapons. Recommend to purchase!
